

Pg 421 13.8.117 & 13.8.118: $A_{1..q}$ stated twice

Pg 409 Second to last par, second sentence
(Should be)
 $So(2,3) \otimes So(8) \rightarrow So(2,6) \otimes So(5)$

Pg 344 $F_{n \dots n_{p-1}d} = e^{\alpha_d(p-d+1)} \phi F_{n \dots n_{p-1}}$ ← missing
 $\hat{F}_{n \dots n_p} = \dots = e^{p\alpha_d} \phi \left(\right)$

Pg 413 (13.8.122) Extra s in
 N_p^s

• States $p=7$ brane solⁿ for
NS $\otimes$ NS but $p=7$ is only
in the R $\otimes$ R

• live above (13.8.123) references
(13.8.115) ← incorrect.

414 • last sent. first para.

$$\tilde{Q}_e = \frac{1}{24p^2} \Omega_{p-p-2}$$

I think this is missing

417 last paragraph

"Now let s consider

↓
Should be US

Pg 426: (14.2.8)

$$\delta \theta^a = \epsilon^a \quad (\text{type set})$$

Pg 434: $S_2 = \int \{C \wedge e^{\mu}\}_{p+1} \wedge \varphi$

- Not a typo but perhaps explain why we'd consider higher terms over $(p+1)$ and if so, over what subspace of M are we integrating over.
