Nostalgia

Temporal: Life, Light & Roses

Amber

For you

Strangers $\leftarrow$ Possibly together?

IDK:

Intro 1.25

Sonadora 11. ~ 60 minutes

Nostalgia 9

Amber 10

Letting go 10

TIKLYM 11

For you 2

Strangers 10

$$u_t = u_{xx}$$

$$0 < x < L, t \geq 0$$

$$u(0, t) = 0 = u(x, 0)$$

$$u(L, t) = 1$$

In hom.

In hom DDZ ex:

$$\ddot{\gamma} + \dot{\gamma} + \gamma = 69$$

$$\hat{\gamma} \equiv \gamma - \underline{69}$$

$$\ddot{\hat{\gamma}} + \dot{\hat{\gamma}} + \hat{\gamma} = 0$$

$$\mathcal{L} = -\frac{1}{4} F_{\mu\nu} F^{\mu\nu} - i \bar{\Psi} \not{D} \Psi + \text{h.c.}$$

$$+ \bar{\psi}_i \gamma_{ij} \psi_j \phi + \text{h.c.}$$

$$+ |\mathcal{D}_\mu \phi|^2 - V(\phi)$$

$\rightarrow -\frac{1}{4} F_{\mu\nu} F^{\mu\nu}$: "light" /
(Dynamics) electromagnetism

$\rightarrow$ Fermions : matter spin part.
(Dynamics) (electron)

$\rightarrow$ Fermion mass by coupling to
Higgs field ϕ

$$\Rightarrow \gamma_{ij} \phi \sim M_{ij}$$

$\rightarrow$ Dynamics of Higgs scalar field

$\leadsto$ $U(1)$ -gauge coupling

i.e. $A = A_\mu dx^\mu \in \mathbb{C} \otimes \Omega^1(M)$

$$A_\mu = A_\mu \in \mathbb{C}$$

$$D = \gamma^\mu D_\mu = \gamma^\mu \left(\partial_\mu - i e \sum_z A_\mu \right)$$
